

BIOLOGIX

Manufacturer and Supplier of Laboratory Consumables

Catalog 2015~2016 A4
www.BiologixGroup.com

BIOLGLX[®]

Company Overview

Biologix Group Ltd is founded in USA in the year 2000 and has since been committed to the design and manufacture of high quality, low-priced scientific and biomedical supplies. Throughout its long company history, Biologix has excelled at providing top quality laboratory supplies to distributors at unbeatable prices. Time and time again, after consistently delivering on this promise and expectation, its customers have positioned Biologix among the top manufacturers of laboratory supplies in the world.

Most products manufactured in our U.S. FDA registered facilities are certified sterile, DNase and RNase Free, and non-pyrogenic using the highest quality, international famous medical-grade plastic materials. Some of the world's top branded laboratory supplies, in vitro diagnostic kits, and medical devices are also produced as OEM and/or Private Labeled products.

Biologix Group Ltd strives to provide its customers with just what they are looking for by engaging in market research and participating in continuous new product development. Your product needs and demands are important to us and our new product development system is designed to better support your needs as our customer. Our focus is on building long term relationships, allowing us to have a better understanding of the knowledge and experience you need to be successful in your market.

With 16 years of know-how, we have developed a focus on meticulous control, constant improvement and innovation, as well as setting standards of excellence in our industry. We are proud to serve thousands of laboratories across the United States, as well as hundreds of distributors around the world.

Your Partner for Success in Life Science!

Private Label and OEM

Biologix also operates as an OEM provider for plastic laboratory consumables. With in-house molding and tooling capabilities, we can provide the specific products needed around the world at significantly lower costs. Biologix is currently supplying some of the top global distributors with its OEM products.

Biologix also offers a Private Labeling Program to provide high quality, branded lab supplies at reduced prices. Many of the Biologix products are currently private labeled and sold worldwide by some of the most prominent brands/distributors.

Product Guarantee

Biologix guarantees 100% satisfaction or your money back! We guarantee the products to be free of defects in workmanship and material. Biologix will replace any defective products upon prompt notification and authorization.

Returned Products

Any return request must be authorized before credit is provided. Please provide the product, invoice number, and reason for the return. A restocking fee may apply. Products 30 days after delivery, special order/custom products are subject to review prior to issuing credit.

Join the Biologix Network

Now you can receive our monthly newsletter, special promotional opportunities by email, and much, much more! Visit our website and sign up to join the thousands of customers already enjoying the Biologix Benefits! Go to www.BiologixGroup.com and sign up today!

Free Product Samples

Let us send you a FREE sample package of our great products. Contact us today if you are interested in trying out the Biologix products before you buy.

Distribution

If interested in distribution opportunities, please contact us for distributor terms. We are accepting distribution opportunities worldwide.

Sample Centrifugation and Concentration

Centrifuge Tubes

FEATURES

- * Gamma radiation sterilized and non-sterilized available
- * Non-pyrogenic
- * 15ml and 50ml conical tubes available
- * Working temperature: stable from -20°C to 121°C
- * Withstand centrifugation of 8,400 RCF for 15ml and 9,400 RCF for 50ml in a fully supported rotor

Clear graduations provide an easy volume reference

Large white writing area for easy marking

Conical bottom for superior separation and pelleting

PACKAGING

1. Foam racked package (Sterile)
 - a) Foam racks offer the convenience of oriented product presentation
 - b) Samples can be viewed without removing tubes from rack
2. Bulk packed package (Sterile & Non-sterile)
 - a) Transparent polyethylene bags are durable and protect the tubes well
 - b) All sterile tubes are packaged with caps attached while non-sterile tubes are packaged with caps separately

*See Biologix Cell Strainers on page 40.

*See Biologix Funnels on page 37.

*See Biologix Tube Racks on page 12, 22.

Note for Sterile Products: Contents sterile unless package is opened or damaged.

10-0815	15ml	Plug Seal	Bulk	No	500/case
10-0850	50ml	Plug Seal	Bulk	No	500/case

CAP DESIGN

1. Flat-top cap

- a) Biologically inert, high density polyethylene provides a chemically resistant surface
- b) Double threaded design to reduce cross-threading, easily opened and closed
- c) Flat top facilitates top writing areas for sample identification

PE flat-top cap
for labeling

2. Plug-seal screw on cap

- a) Biologically inert, high density polypropylene provides a chemically resistant surface
- b) Double threaded design to reduce cross-threading, easily opened and closed
- c) Autoclavable

PP plug-seal cap
is autoclavable

TUBE DESIGN

- * Tubes are made of strong, medical-grade polypropylene
- * Transparent wall permits easy viewing of tube contents
- * Conical bottom design fits most standard floor model and table-top centrifuges
- * Graduation with white ink, in 1ml (for 15ml Tubes) and 5ml (for 50ml Tubes) increments
- * White writing area facilitates sample identification
- * Solvent resistant printing will not rub off during routine laboratory procedures
- * Tubes are covered with leak-proof caps that comply with IATA Safety Standards

Microcentrifuge Tubes

FEATURES

- * Designed to withstand the stresses of high speed centrifugation of 20,000 RCF in a fully supported rotor
- * Made from high quality medical grade polypropylene
- * Transparent wall permits easy viewing of tube contents
- * Attached flat cap for labeling and with writing area on the side of the tube
- * RNase & DNase Free
- * Working temperature: stable from -20°C to 121°C (Autoclavable)
- * 4 attractive colors provide preference and identification of samples
- * Accurate graduation marks: 0.1ml, 0.5ml, 1.0ml and 1.5ml
- * Thumb-friendly beveled lip for easy one-hand operation

Flat cap for labeling

Frosted writing area for easy marking

Accurate graduations from 0.1 to 1.5ml provide an easy volume reference

Conical bottom for easy sample collection

Four colors for optimum sample visibility and organization

Test Tubes

FEATURES

- * Available with two sizes: 12 x 75mm and 13 x 100mm
- * Premium polystyrene tubes are clear like glass while Polypropylene tubes are durable and does not scratch easily
- * Round bottom fits most standard centrifugation machines
- * Caps are precision molded from low-density polyethylene and designed to fit firmly on the tubes
- * Working temperature: stable from -20°C to 60°C
- * Non-sterile, and tested to withstand centrifugation of 5,800 RCF
- * Clearly visible with either clear or turbid samples

Tube Racks

Microtube Rack Design:

- * 80 wells and holds 1.5ml or 2.0ml microlubes
- * 5 assorted colors: blue, green, red, yellow, and purple

FEATURES

Microtube Racks:

- * Molded with a numeric grid for easy tube identification
- * Chemically resistant to alcohols and mild organic solvents
- * Each well is numbered for easy sample identification
- * Side handles for secure handling
- * Easily fill and transfer 80 tubes in compact arrangement (5 x 16 array)

Centrifuge Tube Racks:

- * Made from durable cardboard with superior white coating
- * Chemically resistant to alcohols and mild organic solvents
- * Temperature range: stable from -196°C to 121°C
- * Available with either 36-well or 16-well dividers
- * Holds 15ml or 50ml Centrifuge Tubes
- * Removable lid includes an inventory list writing area

Side handles
for secure handling

Molded with a numeric grid
for easy tube identification

Writing area on the side
of the rack for easy marking

PCR

PCR Tubes

High degree of transparency

FEATURES

- * Manufactured from prime virgin polypropylene
- * Temperature range: stable from -20°C to 100°C
- * Tested to withstand centrifugation of 6,000 RCF in a fully supported rotor
- * Non-sterile
- * Autoclavable in open state
- * Certified RNase, DNase- and endotoxin-free on a lot by lot basis for highest sample integrity
- * Available in colors for optimum sample visibility and organization
- * Extra transparent caps allow for Real-Time PCR applications

Five colors for optimum sample visibility and organization

Optical flat cap strips feature ultra-clear upper surfaces, ideal for real-time PCR applications. They offer a light transmittance much higher than with standard strip caps. Made to seal tube strips and 96-well plates.

Longer cap flanges eliminate sample evaporation

PACKAGING

- * Shipped in re-sealable plastic bags packed in individual boxes – keeping them contamination-free and easily stored
- * 0.2ml single PCR tubes: 1,000 tubes/pack, 10 packs/case
- * 8 strip PCR tubes: strip caps and strip tubes are packed in separate re-sealable plastic bags. One bag of 125 tube strips (1,000 tubes) and one bag of 125 cap strips (1,000 caps) are packed in one cardboard package

TUBES DESIGN

- * Ultra Thin-Wall Tubes provide faster heating and cooling than standard tubes, more efficient heat transfer, and shorter ramping times
- * Conical bottom design fits most of PCR machines

CAPS DESIGN

- * Available with domed caps for efficient heat transfer from cycler's lid or flat cap for easy piercing or labeling
- * Unique cap design eliminates popping during cycling and incubation stages
- * Ideal for Real-Time PCR (qPCR)

PCR Plates

FEATURES

- * Certified RNase & DNase and Endotoxin Free on a lot by lot basis for highest sample integrity
- * Temperature range: stable from -20°C to 100°C
- * Tested to withstand centrifugation of 6,000 RCF in a fully supported rotor
- * Compatible with most popular 96-well thermal cyclers
- * Made from 100% pure virgin polypropylene

PCR PLATES DESIGN

- * Ultra-thin walls of uniform thickness - accelerate heat transfer leading to shorter cycle times and more consistent results
- * Alphanumeric well coding to further assist in sample storage and organization
- * Clear well bottom for sample visibility
- * The half-skirted plate provides superior rigidity and is easy to insert and extract
- * The plate has a working volume of 0.2ml per well

Alphanumeric coding assist in sample organization

Half-skirted plate is easy to insert and extract

Non-skirted plate is convenient and easy to cut

Cryogenic

The **leader and complete solution provider**
in the Biorepository Kingdom

CryoKING Cryogenic Line

- Cryogenic Vials
- Cryogenic Combo
- Scanner & Software
- Cryogenic Boxes
- Freezer Racks
- BioBank Management Software

CryoKING means---

- The Ultimate Identification

- Pre-Set or custom Datamatrix 2D barcodes
- Scan Ready Design
- Never loose labels
- No need to take out tubes for identifications
- 5 seconds scan
- Total automation

- Always 10 x 10

to store 23% more samples
compared with 9 x 9 boxes

- One Inch Revolution

Double Your Sample Storage with Half the Space and Cost

CryoKING® Combo

Scan-Ready Cryoboxes filled with 2D barcoded cryovials

Screw Cap Microtubes

FEATURES

- * Ultimate in applications from sample storage in Ultra-low temperature freezer to boiling applications
- * Polypropylene material makes these screw cap tubes perfect for almost every long term storage application.
- * Superior clarity and phenomenal strength
- * Universal screw threads for use
- * Tubes fit most common rotors
- * Autoclavable to 121°C and freezable to -80°C
- * Tubes fit standard 1-inch and 2-inch, 81-well and 100-well freezer boxes

Tubes with ribs lock in place enable single-handed operation

All sterilized Cryogenic Vials are packed with caps attached and include o-rings.

* See our full line of Cryogenic Storage Boxes from page 22 to 25.

Premium Cardboard Freezer Boxes

FEATURES

- * Made from durable cardboard with variety of outer coatings: (Superior white, Plasti-Coat™, or Cryo-Color™)
- * Chemically resistant to alcohols and mild organic solvents
- * Temperature range: stable from -196°C to 121°C
- * Suitable for liquid nitrogen storage

BOX DESIGN

- * Available in 1 inch, 2 inch, 3 inch sizes with either 81-well, 100-well, 36-well or 16-well dividers
- * Select from our Superior white coating, our Plasti-Coat™ laminated coating or our Cryo-Color™ boxes (Red, blue, yellow, and green)
- * Holds 0.5ml, 1.5ml or 2.0ml microtubes and 15ml, 50ml Centrifuge Tubes
- * Removable lid includes a frame box for labeling or writing

ID-Color™ Cardboard Freezer Boxes

Alphanumeric grid for orientation

FEATURES

Hinged lid prevents misplace or loss

- * The lid, bottom, and four sides feature alphanumeric identifications for fast, easy, and error-free identification of individual samples
- * 5 attractive colors provide preference and identification of samples
- * Water resistant ID-Color™ coating allows for improved durability
- * Hinged lid prevents accidental misplace or loss
- * Sturdy and straight plastic dividers withstand ultra low temperatures
- * Holds 0.5ml/1.5ml/2.0ml microtubes and cryogenic vials

Sturdy and straight plastic dividers withstand ultra low temperature

PC Freezer Boxes

FEATURES

- * For easy inventory management of cryogenic vials used in tissue culture, pharmaceutical research and other biotechnology labs
- * Store in mechanical freezers or liquid nitrogen
- * Boxes are vented, allowing rapid cooling of contents and full drainage
- * Made of tough polycarbonate for use with temperatures from -196°C to 121°C
- * Chemically resistant to alcohols and mild organic solvents

BOX DESIGN

- * 9x9 well storage (81-well total) or 10x10 well storage (100-well total) or 5x5 well storage (25-well total)
- * Boxes are designed with international standard size, which can fit all of the standard cryogenic vials and freezer racks
- * With 5 assorted colors: red, yellow, green, blue, and white for better color-coding
- * Holds 0.5ml, 1.5ml or 2.0ml microtubes and cryogenic vials
- * 81-well and 25-well box features a removable lid includes a numbered grid for orientation
- * 100-well box with numeric identification on each column for quick sample identification

Stainless Steel Freezer Racks

FEATURES

- * Fully functional Freezer Rack is constructed of corrosion-resistant stainless steel
- * Sliding Drawer Freezer Racks include handles for easy removal off the shelf
- * Optimize Freezer Storage Space
- * Ideal for storage of 2" and 1" standard size boxes
- * Fits most standard upright freezers
- * Available with Sliding Drawer, Frame Type and Vertical Type Freezer Racks

Sliding Drawer Freezer Racks
Patent No.: 201120501928. X

RACKS DESIGN

Handles for easy removal off the shelf
Colored labels for drawer/sample identification

Flanging design reduces scratch

Folded rails to reduce frost

Fits most freezers
and optimize storage space

*See our full line of Cryogenic Storage Boxes from page 22 to 25.

*See our full line of Cryogenic Vials from page 20 to 21.

Liquid Handling

Pipet Tips

Snap fastener

FEATURES

- * Available in 10µl, 200µl and 1000µl pipet tips
- * 10µl and 200µl tips are graduated, easy to visually check the volume pipetted
- * Made from polypropylene
- * 200µl tips with beveled point design reduces sample retention
- * Durable and attractive racks can be repeatedly used
- * Special design reduces sample loss and save costly reagents
- * Autoclavable
- * RNase & DNase Free
- * Available sterile & non-sterile
- * Universal fit to most pipettors
- * 100% inert
- * Different volume with different color for identification of samples
- * Fast and effective analyte transport

Graduated to allow for visual checking of volume draw

Transfer Pipets

FEATURES

- * Polyethylene pipettes will not shatter or break
- * Good alternative to pasture pipettes and rubber bulbs
- * Perfect products for quick, safe transfer of fluid
- * Long flexible stem can be bent to draw liquid from narrow or small volume tubes into the bulb
- * Uniform drop size
- * Available with gamma irradiation sterilized or non-sterilized
- * Integral, self-contained pipettes eliminate the problems of attaching rubber bulbs and suction devices or changing pipette tips
- * Good thickness distribution guarantees suction force

PIPET DESIGN

- * Available with 2 capacities of 1.0 and 3.0ml
- * Molded graduations
- * 100% inert for accurate sampling
- * Transparent wall permits easy viewing of pipette contents

PACKAGING

- * Individually package in easy-open paper/plastic pouch is available
- * Also available with bulk package

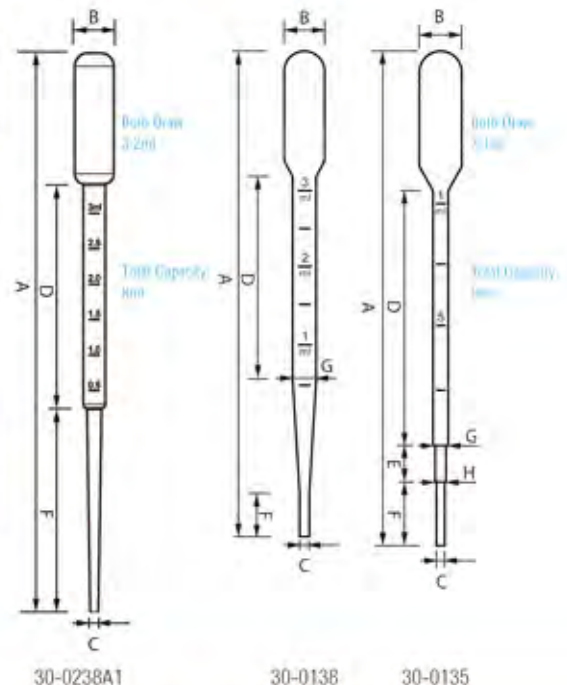

ORDERING INFORMATION

Cat #	Package	Length	Graduated To	Sterile	Unit
30-0135	Bulk	160.0mm	1ml	No	500 /pack, 4 Packs/case
30-0135A1	Individually Wrapped	160.0mm	1ml	Yes	500 /pack, 4 Packs/case

Solution Basins

FEATURES

- * Materials: PVC, polystyrene, and strong polypropylene
- * Angled sides and V-shaped bottom permits easy access to solution
- * Polypropylene basin is chemically resistant to alcohols and mild organic solvents
- * PVC basin has transparent walls to permit easy viewing of contents
- * Can be used with single or multi-channel pipettors

BASIN DESIGN

You can put your logo here

Clear numbers for easy identification

Autoclavable and reusable

- * Available in PVC super clear, polystyrene white, and polypropylene 12-channel
- * PS basins are available with 3 capacities: 25ml, 50ml, 100ml. PVC basin max capacity is 55ml
- * Polypropylene 12-channel basin: individual channels hold 5ml, flip-side is 50ml volume
- * Polypropylene basin comes in assorted colors: clear, blue, green, red, and yellow

Both sizes are functional

Tri-Cornered Beakers

FEATURES

- * Features a tri-corner design that provides three dripless pouring spouts
- * Six different sizes meet different needs
- * Have good impact strength and are translucent and autoclavable
- * Economical enough to be disposable and easy to clean and durable enough for reuse

BEAKER DESIGN

- * Materials: Strong, medical-grade polypropylene
- * Available in 50ml, 100ml, 250ml, 400ml, 800ml and 1,000ml

If they fall, they will not break like glass beakers do

Dripless pouring spout offers more security

Funnels

FEATURES

- * Made of high grade PP, resistant to most chemicals
- * Funnel comes with a short bore that works best for liquids
- * Funnel is economical, fast and efficient
- * PP material has high transparency and thermostability
- * Light weight and durable-won't break or shatter like glass
- * Autoclavable

Tissue Culture

Cell Scrapers & Lifters

Activity
scratch
head

FEATURES

Cell Scrapers

- * Available in two sizes: 18cm and 25cm
- * Non-pyrogenic
- * Polyethylene
- * Pivoting blade makes precise cutting and scraping movements
- * Appropriate for a variety of cell culture vessels
- * The uniquely designed handle and blade reduce cell damage during the harvesting process
- * Pre-sterilized and individually wrapped in peel-open packaging

Cell Lifters

- * Used with dishes and cell culture clusters for quick removal of cell layers
- * Blade Length: 2.0cm; Handle Length: 16cm
- * Gamma radiation sterilized and individually wrapped
- * Disposable lifters quickly remove cell layers
- * The one-piece design and chiseled blade provide improved control while minimizing damage during the cell removal process
- * Non-pyrogenic
- * Polyethylene

Anti-skidding

Cell Strainers

FEATURES

- * Strong nylon mesh for optimal performance in a variety of applications
- * Evenly spaced mesh pores providing consistent and reliable results
- * Polypropylene frame features a molded tab for easy handling
- * Conveniently accessible in individual packaging with gamma radiation sterilization
- * Fits perfectly into 50ml Biologix Centrifuge Tubes
- * Different colors for easy pore size identification

Cell Spreaders

FEATURES

- * Ideal for even spreading of bacterial cultures
- * Disposable
- * Smooth spreading surface with slight upward angle reduces the risk of damaging agar surface
- * L-shape allows application on the entire Petri Dish or plate surface
- * Gamma radiation sterilized
- * Polystyrene

PACKAGING

- * Available in individually wrapped and 10 pieces per bag which keep them safe from contamination and easy to be used
- * 10 pieces pack includes a piece of cardboard with product description to better protect products and the bag can be resealed

Inoculating Loops & Needles

FEATURES

- * High impact polystyrene loops and needles are smooth and flexible to facilitate uniform and smooth streaking without damaging the gel surface
- * Needles are straight and suitable for removal of specimens of single colonies
- * Packed sterile in safe, tamper proof, zip-seal resealable bags
- * The other end of the loops can be used as needles
- * Freedom from lubricants, oils and electrostatic charges enables consistent wetting and complete liquid transfer

LOOP/NEEDLE DESIGN

- * Loops available in 1µl and 10µl sizes
- * Needles are ideal for the removal of single colonies
- * Ultra-smooth loop surface

PACKAGING

- * 25 Pieces per bag keep them safe from contamination and easy to be used
- * 25 pieces pack includes a piece of cardboard with product description to better protect products and the bag can be resealed

Histology

Slide Storage Boxes

FEATURES

- * Made from strong ABS material which is unaffected by humidity and is thoroughly insect proof
- * Store 1" x 3" (25mm x 75mm) microscope slides
- * Superior design prevents slides breakage and block dust from contaminating slides
- * Each slot is numbered to correspond to the slide inventory sheet on the inside cover
- * The 100-place box is secured with a rust-resistant clasp and hinge pin

BOX DESIGN

- * Available in 25-place or 100-place volume
- * Choose from either traditional cork or foam
- * 5 assorted colors (red, yellow, green, blue, and white) make the boxes easy to identify
- * Boxes are stackable to save space

- This is easy to be labeled
- Easy for each sample notes
- Rust-resistant clasp to secure the box
- Stackable to save space

Microscope Slides

FEATURES

- * The slides are with clean glass surface
- * Ground edges prevent personal injury and chipping of glass caused by the cut edges
- * The glass slide end faces are polished
- * The slides without frosted area can be effectively used
- * The slides with frosted area are convenient for classification and storage

Polished end prevents personal injury

With frosted end and pencils can write on the area. Since the written characters are indelible in staining fluids or solvents, the glass slides of this type are convenient for classification and storage.

ORDERING INFORMATION

Cat #	Material	Type	Size	Sterile	Unit

*See Biologix Slide Storage Boxes and Slide Mailers on page 46 and 48.

Slide Mailers

FEATURES

- * Made of sturdy cardboard to protect slides
- * Finger slots for easy removal of slides
- * Folding lids protect samples on slides
- * Storage and a safe transport method of microscope slides

DESIGN

- * Available in 20-place volume
- * 20-place mailer includes an inventory sheet and storage box
- * For 20-place mailers, they are packed 10 pieces in one inner durable pack to better protect products

- Sturdy cardboard to protect slides
- Packed by durable box to better protect mailers
- Finger slots for easy removal of slides
- The writing area is easy for notes

41-4020

Drosophila

Drosophila Vials

FEATURES

- * Vials are precision moulded from premium grade polystyrene
- * Glass-like clarity for easy sample viewing
- * Disposable vials are a safe and cost-saving alternative to glass vials

The tray pack is great for quick, effortless filling

Light weight and easy for handling

You can put your logo here

VIAL DESIGN

- * Available in narrow (25 x 95mm) and wide (28.5 x 95mm)
- * Both narrow and wide vials are available in bulk and tray packaging
- * The tray pack 10 x 10 row configuration is great for quick, effortless filling

If they fall, they will not break like glass vials do

ORDERING INFORMATION

Drosophila Bottles

FEATURES

- * Made of polypropylene and can be autoclaved, yet are economical enough to throw away after single use
- * A pliable top permits easy closure removal
- * The square-bottom is also transparent and features a firm, stiff neck for easier handling

BOTTLE DESIGN

- * 6oz (177ml) bottle
- * Molded graduations in 25ml increments up to 100ml
- * Square bottom
- * Available in both bulk and tray packaging

Drosophila Plugs

FEATURES

- * Made of high density foam
- * Offer minimal shedding as well as reduce evaporation
- * Superior barrier to mite infestation
- * Exact fit with narrow 0.9 in. (25mm) or wide 1.1 in. (28.5mm) diameter vials or 6oz (177ml) bottles
- * Stretches yet maintains tight fit after repeated removal and closing
- * Flat surface accepts marking pen

Flat surface accepts marking pen

Fit well with bottles

Gloves

FEATURES

Powder Free Latex Disposable Gloves

- * Powder-free, single chlorinated to provide good dry hand donning capability
- * Full textured surface enhances grip for efficient instrument handling
- * Good grip to handle dry instruments when moderate amount of handling is required
- * Good Thickness Distribution for tactile sensitivity
- * Suitable for all types of medical examination, home care and diagnostic and laboratory use
- * Biocompatibility Tested (ISO 10993)
- * Ambidextrous
- * Non-Sterile
- * Natural to Light Yellow Color

Powder Free Nitrile Disposable Gloves

- * Non-added components (sulphur and accelerator chemicals) to minimize exposure to Type IV hypersensitivity
- * Non-latex formulation eliminates exposure to Type 1 latex protein sensitivity
- * Nitrile material promotes better puncture and chemical/ chemo resistance properties
- * Low Dermatitis Potential Claim
- * Finger textured with improved working grip to enable efficient instrument handling in wet and dry condition
- * Beaded cuff design to don gloves efficiently and securely
- * Extra Length
- * Biocompatibility Tested (ISO 10993)
- * Ambidextrous
- * Non-Sterile
- * Dark Blue Color

Application Guidelines

Maximum centrifugal acceleration force can be influenced by following criteria:

- * Use of organic solutions, temperature below 0°C, centrifuging without centrifuge adapter, etc. Conduct a trial run to determine proper conditions before any critical use begins.
- * The RCF or G (relative centrifugal force) ratings for the disposable centrifuge tubes have been established at room temperature using tubes filled to nominal capacity with water and centrifuge for 30 minutes. The centrifuge must be equipped with the recommended carriers, adapters, and cushions that fully support the tubes. If an angle head rotor is used or proper support is not provided, G values will be lower.
- * Do not confuse speed or revolutions per minute (RPM) with relative centrifugal force (RCF). Instructions for centrifuging a sample at a given RPM and time are incomplete unless the rotor or radius is specified. Protocols should always state the time and RCF value for centrifuging a sample.

Autoclaving guideline for Plastics

To ensure successful steam sterilization of your plastic labware please adhere to the following guideline:

Autoclave all plastic consumables at 121°C for 15 minutes, 15psi/1 atm. Do not use a dry cycle as this may cause deformation or weakening of the plastic. Allow temperature within the autoclave to return to at least 80°C before removing product.

NOT ALL PRODUCTS ARE AUTOCLAVABLE.

Our Commitment in Quality

At Biologix, we look at quality from every angle in terms of functionality, safety, purity, formulation, consistency, manufacturing, customer service, technical support and many more-to consistently ensure customer satisfaction.

Under our detailed QA/QC procedures for our facility, each and every product are traceable by lot, regardless of packaging format. They must go through a five-step, human inspection before it is released for packaging.

Our facility is completely equipped with the latest instruments and technology from the most trusted manufacturers which ensures that Biologix applies the most stringent standards to certify products to be free from RNase, DNase, endotoxin (pyrogens), etc.

In addition to being ISO 9001:2008, CE, and FDA compliant, we also make available to our customers lot specific certificates such as Sterilization Certificates, Nucleases Free Certificates, Certificate of Origin, etc. Certificates of Compliance can also be downloaded and printed directly from our website: www.BiologixGroup.com.

Note: Product parameters within this catalogue are for reference only.
